HDR DATASET NOTE

Mayo Clinic primary biliary cholangitis trial

HDR-US-0001 | version 1.0.0 | 2026-11-02

DOI	Pending, minted at publication
CREATORS	Imad El Badisy
COVERAGE	United States of America
PERIOD	1974 to 1984
UNIT	Patient
LICENCE	CC BY 4.0
LANDING PAGE	https://elbadisyimad.com/hdr/datasets/us-mayo-pbc-trial/

Description

Patients with primary biliary cholangitis seen at the Mayo Clinic, 1974 to 1984: the 312 participants of the randomised trial of D-penicillamine versus placebo and 106 eligible patients who were followed but not randomised, with laboratory values and survival.

The reference dataset for the Mayo risk score and a standard example for Cox and competing-risk models.

GOOD FOR

- Teaching Cox and competing-risk models
- Handling missing laboratory values

NOT GOOD FOR

- Treatment comparison using the non-randomised patients

Origin

ORGANISATION	Mayo Clinic
PUBLICATION	*Fleming TR, Harrington DP (1991). Counting Processes and Survival Analysis. Wiley; Therneau TM, Grambsch PM (2000). Modeling Survival Data. Springer*
COUNTRY	United States of America
ADDRESS	https://CRAN.R-project.org/package=survival
ACCESSED	2026-11-02
REUSE TERMS	Distributed openly for research in the survival R package (LGPL).
HOW OBTAINED	Taken from the BioBench R package (dataset pbc), which took them from survival::pbc.

Files

File	Content	Rows	Cols	Size
`pbc.csv`	One row per patient	418	20	32 kB
`us-mayo-pbc-trial.xlsx`	All tables in one workbook, with About and Variables sheets			50 kB

SHA-256 checksums of every file are listed in `manifest.csv` on the landing page.

Variables

`pbc.csv` One row per patient

Variable	Type	Description
`id`	integer	Patient identifier

`time`	integer	Days from registration to death, transplant or end of follow-up
`status`	integer	Status at end of follow-up (0 censored, 1 transplant, 2 dead)
`trt`	integer	Treatment (1 D-penicillamine, 2 placebo, missing not randomised)
`age`	number	Age (years)
`sex`	string	Sex (m, f)
`ascites`	integer	Ascites (1 yes, 0 no)
`hepato`	integer	Hepatomegaly (1 yes, 0 no)
`spiders`	integer	Spider angiomas (1 yes, 0 no)
`edema`	number	Oedema (0 none, 0.5 untreated or controlled by diuretics, 1 despite diuretics)
`bili`	number	Serum bilirubin (mg/dL)
`chol`	integer	Serum cholesterol (mg/dL)
`albumin`	number	Serum albumin (g/dL)
`copper`	integer	Urine copper (ug/day)
`alk.phos`	number	Alkaline phosphatase (U/L)
`ast`	number	Aspartate aminotransferase (U/mL)
`trig`	integer	Triglycerides (mg/dL)
`platelet`	integer	Platelet count
`protime`	number	Standardised blood clotting time (s)
`stage`	integer	Histologic stage (1 to 4)

Known issues

Read these before analysis.

1. **Demonstration entry.** Taken from the BioBench R package to show how HDR presents a dataset. It has not gone through HDR review and will be removed before launch.
2. **Rows 313 to 418 were not randomised** (trt is missing) and have more missing values.
