HDR DATASET NOTE

Copenhagen Stroke Study

HDR-DK-0001 | version 1.0.0 | 2026-11-11

DOI	Pending, minted at publication
CREATORS	Imad El Badisy
COVERAGE	Denmark
PERIOD	1992 to 1993
UNIT	Patient
LICENCE	CC BY 4.0
LANDING PAGE	https://elbadisyimad.com/hdr/datasets/dk-copenhagen-stroke-study/

Description

Patients admitted with acute stroke to Bispebjerg Hospital, Copenhagen, in the Copenhagen Stroke Study: 518 patients with cardiovascular risk factors, stroke subtype, Scandinavian Stroke Scale score at admission and long-term survival.

A subset of a community-based stroke cohort, used in the pec package to show prediction error curves for Cox models and random survival forests.

GOOD FOR

- Teaching survival analysis and prognostic models
- Comparing Cox models with random survival forests

NOT GOOD FOR

- Estimating stroke incidence or case fatality in Denmark

Origin

ORGANISATION	Copenhagen Stroke Study, Bispebjerg Hospital
PUBLICATION	*Jorgensen HS, Nakayama H, Reith J, Raaschou HO, Olsen TS (1996). Acute stroke with atrial fibrillation. The Copenhagen Stroke Study. Stroke 27(10): 1765-1769*
COUNTRY	Denmark
ADDRESS	https://CRAN.R-project.org/package=pec
ACCESSED	2026-11-11
REUSE TERMS	Distributed openly for research in the pec R package (GPL 2 or later).
HOW OBTAINED	Taken from the BioBench R package (dataset stroke), which took them from pec::cost.

Files

File	Content	Rows	Cols	Size
`copenhagen_stroke.csv`	One row per patient	518	15	37 kB
`dk-copenhagen-stroke-study.xlsx`	All tables in one workbook, with About and Variables sheets			39 kB

SHA-256 checksums of every file are listed in `manifest.csv` on the landing page.

Variables

`copenhagen_stroke.csv` One row per patient

Variable	Type	Description
`age`	integer	Age (years)
`sex`	string	Sex (female, male)
`hypTen`	string	Hypertension (yes, no)
`ihd`	string	History of ischaemic heart disease at admission (yes, no)
`prevStroke`	string	Previous stroke before admission (yes, no)
`othDisease`	string	Other disabling disease, such as severe dementia (yes, no)
`alcohol`	string	Daily alcohol consumption (yes, no)
`diabetes`	string	Diabetes, blood glucose above 11 mmol/L (yes, no)
`smoke`	string	Daily smoking (yes, no)
`atrialFib`	string	Atrial fibrillation (yes, no)
`hemor`	string	Stroke subtype (yes haemorrhage, no infarction)
`strokeScore`	integer	Scandinavian Stroke Scale score at admission (0 worst to 58 best)
`cholest`	number	Serum cholesterol
`time`	integer	Days from admission to death or end of follow-up
`status`	integer	Status at end of follow-up (1 dead, 0 censored)

Known issues

Read these before analysis.

1. **Demonstration entry.** Taken from the BioBench R package to show how HDR presents a dataset. It has not gone through HDR review and will be removed before launch.
2. **A subset of the study.** The full Copenhagen Stroke Study enrolled 1,197 patients; how these 518 were selected is not documented.
3. **Cholesterol units are not documented.** Values suggest mmol/L.
