HDR DATASET NOTE

Morocco Global Youth Tobacco Survey, student records

HDR-MA-0003 | version 1.0.0 | 2026-11-02

DOI	Pending, minted at publication
CREATORS	Imad El Badisy
COVERAGE	Morocco
PERIOD	2016 to 2016
UNIT	Student
LICENCE	CC BY 4.0
LANDING PAGE	https://elbadisyimad.com/hdr/datasets/ma-gyts-youth-tobacco/

Description

Student-level records from the Global Youth Tobacco Survey (GYTS) in Morocco: tobacco and e-cigarette use, exposure to second-hand smoke, media and school messages, and family background, with survey weight, stratum and primary sampling unit for design-based analysis.

The GYTS is the global standard survey of tobacco use among school students. This file keeps one row per student with the weight, stratum and PSU needed for weighted estimates.

GOOD FOR

- Weighted prevalence of tobacco use among students
- Teaching survey-design analysis

NOT GOOD FOR

- Unweighted prevalence estimates

Origin

ORGANISATION	World Health Organization and US Centers for Disease Control and Prevention, with the Ministry of Health of Morocco
PUBLICATION	*Global Youth Tobacco Survey (GYTS), Morocco*
COUNTRY	Morocco
ADDRESS	https://www.cdc.gov/tobacco/global/gtss/index.html
ACCESSED	2026-11-02
REUSE TERMS	GYTS public-use data files are released by CDC for research use with attribution.
HOW OBTAINED	School-based survey of students aged 13 to 15. Records were taken from the BioBench R package (dataset tobaccomorocco), which took them from the biostatlab package; blank answers are coded as missing.

Files

File	Content	Rows	Cols	Size
`gyts_morocco.csv`	One row per student	3,915	27	1.2 MB
`ma-gyts-youth-tobacco.xlsx`	All tables in one workbook, with About and Variables sheets			337 kB

SHA-256 checksums of every file are listed in `manifest.csv` on the landing page.

Variables

gyts_morocco.csv One row per student

Variable	Type	Description
FinalWgt	number	Final survey weight
age	string	Age group
gender	string	Sex
income	string	Pocket money available
parent_work	string	Which parents work
father_education	string	Father's education
mother_education	string	Mother's education
living_env	string	Urban or rural
age_first_cig	string	Age at first cigarette
cigar_use	string	Smoked cigarettes in the past 30 days
noncig_use	string	Used other smoked tobacco in the past 30 days
smokeless_use	string	Used smokeless tobacco in the past 30 days
parent_smoke	string	A parent smokes
friends_smoke	string	How many close friends smoke
home_SHS	string	Exposed to second-hand smoke at home
outside_SHS	string	Exposed to second-hand smoke outside the home
indoor_ban	string	Supports a ban on smoking in enclosed public places
outdoor_ban	string	Supports a ban on smoking in outdoor public places
antitobacco_media	string	Saw anti-tobacco messages in the media
antitobacco_school	string	Taught about the dangers of tobacco at school
tobacco_media	string	Saw tobacco advertising or promotion
offer_freetobacco	string	Was offered free tobacco products
own_items	string	Owns an item with a tobacco brand logo
knowledge_harm	string	Thinks second-hand smoke is harmful
e_cig	string	Has used e-cigarettes
Stratum	integer	Sampling stratum
PSU	integer	Primary sampling unit (school)

Known issues

Read these before analysis.

1. **Demonstration entry.** Taken from the BioBench R package to show how HDR presents a dataset. It has not gone through HDR review and will be removed before launch.
2. **Use the survey design.** Ignore FinalWgt, Stratum and PSU and the estimates will be biased and the standard errors too small.
