## Description

Clinical records and follow-up of 299 patients with left ventricular systolic dysfunction admitted to the Faisalabad Institute of Cardiology and the Allied Hospital, Faisalabad, Pakistan, in 2015, with time to death or censoring.

A small, complete cohort widely used to teach survival analysis and to compare prediction models.

GOOD FOR

- Teaching survival analysis
- Small-sample prediction examples

NOT GOOD FOR

- Population-level estimates of heart failure mortality

## Origin

| | |
|---|---|
| ORGANISATION | Government College University and Faisalabad Institute of Cardiology |
| PUBLICATION | *Ahmad T et al. (2017). Survival analysis of heart failure patients: a case study. PLOS ONE 12(7): e0181001* |
| COUNTRY | Pakistan |
| ADDRESS | https://doi.org/10.1371/journal.pone.0181001 |
| ACCESSED | 2026-11-02 |
| REUSE TERMS | Published with the article under CC BY 4.0; reused by Chicco and Jurman (2020). |
| HOW OBTAINED | Taken from the BioBench R package (dataset heartfailure), which took them from the biostatlab package. |

## Files

| File | Content | Rows | Cols | Size |
|---|---|---|---|---|
| `heart_failure.csv` | One row per patient | 299 | 13 | 12 kB |
| `pk-heart-failure-faisalabad.xlsx` | All tables in one workbook, with About and Variables sheets | | | 27 kB |

SHA-256 checksums of every file are listed in `manifest.csv` on the landing page.

## Variables

**`heart_failure.csv`** One row per patient

| Variable | Type | Description |
|---|---|---|

| | | |
|---|---|---|
| age | number | Age (years) |
| anaemia | integer | Anaemia (1 yes, 0 no) |
| creatinine_phosphokinase | integer | CPK enzyme in blood (mcg/L) |
| diabetes | integer | Diabetes (1 yes, 0 no) |
| ejection_fraction | integer | Left ventricular ejection fraction (%) |
| high_blood_pressure | integer | Hypertension (1 yes, 0 no) |
| platelets | number | Platelets (kiloplatelets/mL) |
| serum_creatinine | number | Serum creatinine (mg/dL) |
| serum_sodium | integer | Serum sodium (mEq/L) |
| sex | integer | Sex (1 man, 0 woman) |
| smoking | integer | Smoker (1 yes, 0 no) |
| time | integer | Follow-up time (days) |
| DEATH_EVENT | integer | Died during follow-up (1 yes, 0 censored) |

## Known issues

Read these before analysis.

1. **Demonstration entry.** Taken from the BioBench R package to show how HDR presents a dataset. It has not gone through HDR review and will be removed before launch.
2. **Follow-up is short** (4 to 285 days).
